- Tactical and EMS experience
- Coastal recreation

*"THIS HAS BEEN MY FAVORITE ROTATION.
THE WORK IS EXCITING, BUT THE PEOPLE ARE INCREDIBLE."*

Welcome to the Emergency Departments at CHRISTUS Spohn Hospitals in Corpus Christi, where we provide comprehensive care in busy regional trauma, stroke, and cardiac centers, catering to a diverse mix of patient presentations.

Our 4-week Emergency Medicine rotation offers medical students the opportunity to evaluate and treat acutely ill and injured patients from presentation to discharge. In addition to hands-on patient care, students participate in small group learning sessions, hands-on laboratories, and program-wide didactics. They enhance their medical knowledge through student-oriented reading assignments, procedure and simulation labs, and case conferences. Students also have the unique opportunity to ride along with the Corpus Christi Fire Department EMS, gaining invaluable experience in pre-hospital care.

At CHRISTUS Spohn, medical students are encouraged to take ownership of the patient care they provide and are valued as integral members of

the healthcare team. Our dedicated and enthusiastic faculty and resident physicians serve as mentors and educators, providing guidance and support throughout the rotation and beyond.

With a diverse and complex patient population, extensive opportunities for procedural performance, and a unique structure of our residency program, our rotation consistently ranks as a favorite medical student experience.

To ensure exceptional individual attention, enrollment is strictly limited. We also offer 4-week rotations in Emergency Ultrasound, Medical ICU, Simulation and Wilderness Medicine for qualified students, further enriching their educational experience.

Experience the excitement and challenges of emergency medicine at CHRISTUS Spohn Hospitals in Corpus Christi. Join us and embark on a journey of discovery, learning, and growth in one of the most dynamic fields of medicine.
